

SEAWAG

# WE ARE SEAWAG!

**SEAWAG is one of Europe's fastest growing brands in the water sports and leisure industry!!!**

**SEAWAG** is offering a full range of waterproofing solutions for smartphones, tablets, cameras, and other valuables.

It all started from the day we realized that everyone has some valuables to protect from water, sand, snow, and dust. However, most people didn't know a solution existed.

We understood that people didn't buy waterproofing solutions for smartphones simply because they were unaware of their existence.

**SEAWAG** became the solution. We began in the French water sports market with an innovative selling concept, the display, and with a very cool product that allows the customer to bring their smartphone, keys, cash, cards, and any other valuables absolutely anywhere, including underwater! **SEAWAG** allows our customers to use all the functions of their device, while fully protected inside the case, and also make stunning photos and videos underwater!

Our innovative and unique selling concept, the display, is LED or LCD (depending on the size). Our incredibly eye-catching display is a flashy video player that we place underwater to create that guaranteed WOW effect!!!

**SEAWAG** started in late 2013, but only a few years later, we are present in 3000 retailers across 67 countries.

In the 21st century, we all have a mobile phone, camera, keys, wallet, etc... Water, rain, sand, snow, and dust do not mix well with these valuables.

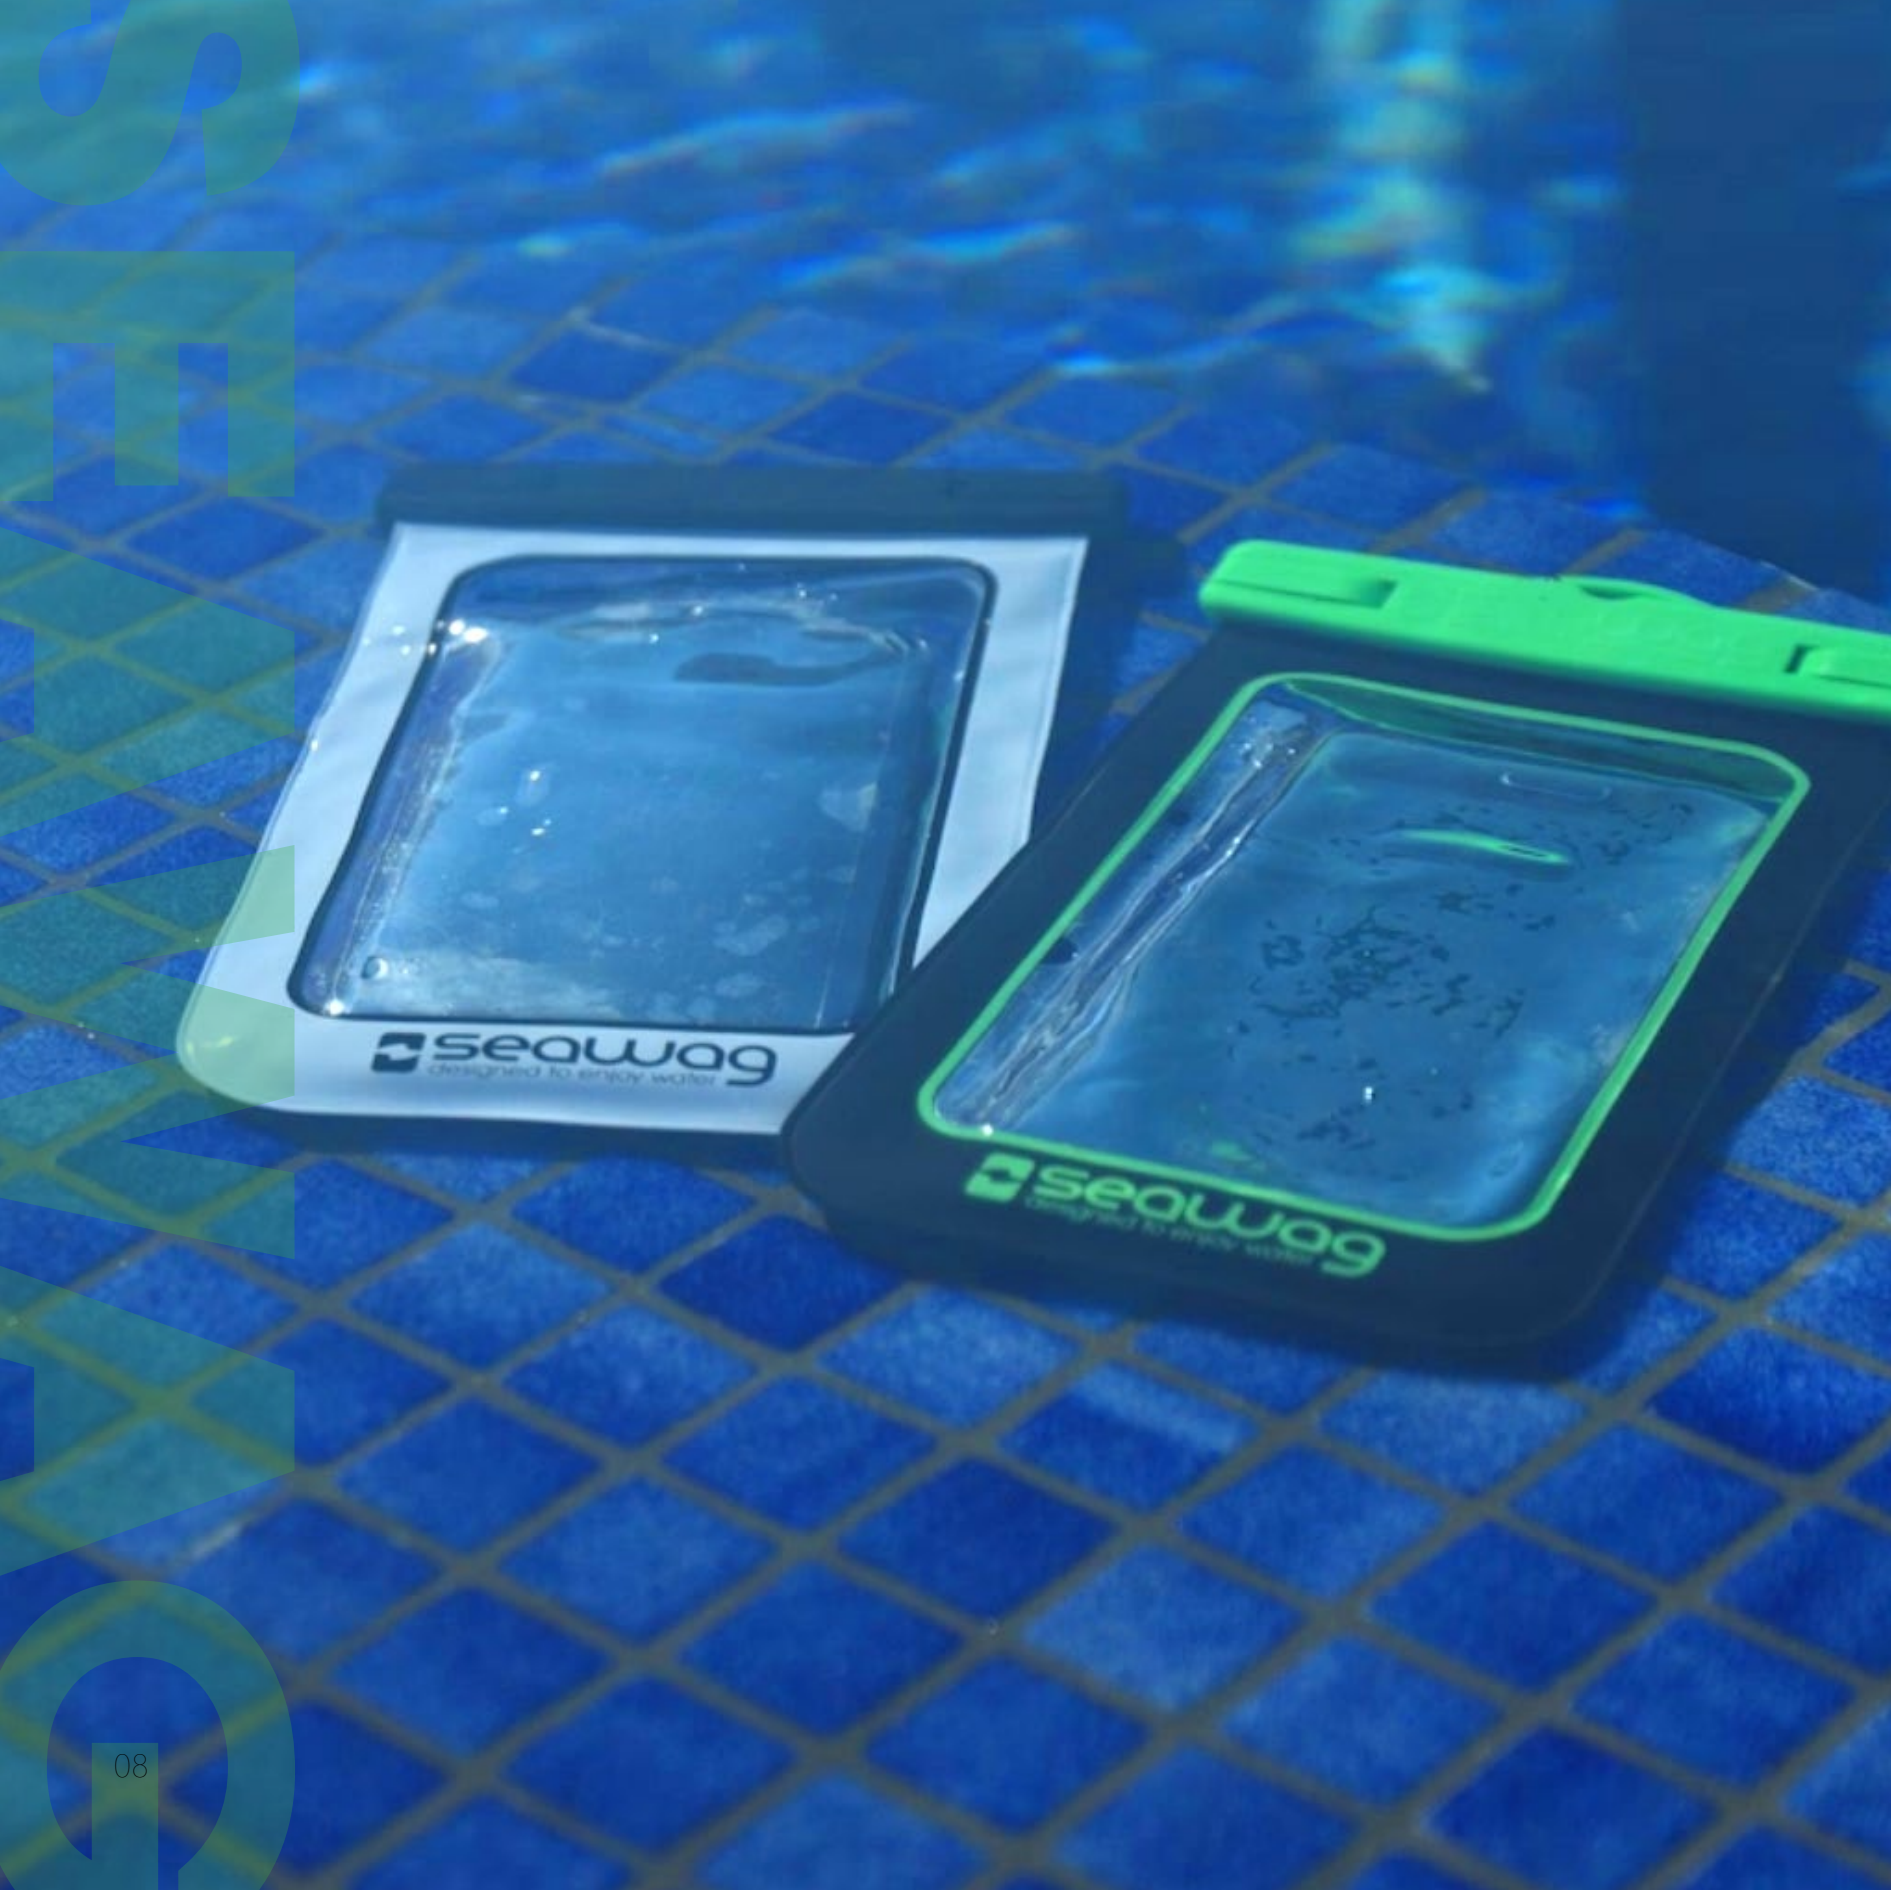

We participate in outdoor activities, water sports, spend holidays by the seaside, or just get caught in the rain.

Basically, millions of us have the need to protect our valuables from the elements. Most of us need a waterproofing solution but have not yet acquired it or even asked for it.

The reason is simple; people never ask for something they haven't seen. Until now, none of the existing brands on the market have displayed this product properly.

**SEAWAG has come to make the change!**
